

Rollforming unit VEAW-K

Increasingly thinner and harder body blanks are being processed. The reengineered SABATEC VEAW-K rollforming unit will provide for an optimum rounding results.

RAVE70900

Advantages

- Adjustable pre-rounding wedge
- Smaller rounding rolls
- Less deformation in the construction material
- Stronger bearings, lubrication from the outside
- Carbide rounding wedge adjustable via segments
- No out-of-round body shapes
- Height range up to 320mm
