

Ceramic hour glass roll

SABATEC highly recommends ceramic hour glass rolls on your calibration tool. The material is highly durable, low-wear and has very long service life during the welding process.

SABATEC's ceramic hour glass rolls are fully insulated, pre-assembled and ready to go.

Advantages

- 20 times longer service life than steel rolls
- Less traces of wear
- Superior electrical insulation – no heating up during production
- No traces of welding spatters on ceramic roll
