

Wire chopper

SABATEC's wire chopper is suitable for all common canbody welding machines. It is delivered as a complete unit and can be easily mounted.

All the parts are produced with high quality materials. Wear parts, such as the chopper knives, can be replaced independently on the wire chopper wheel.

The wire chopper wheel is available with 8 or 10 knives (vacuum system), just as you prefer.

Advantages

- Blades can be used on both sides, just turn the wire chopper wheel
- Blades can be replaced independently on the wire chopper wheel
- The wire chopper wheel is available with 10 knives for shorter copper chips.
- The wire chopper unit can be mounted independently from the welding machine to prevent wire leftovers dropping inside the production line
