

Rollforming unit for FBB

The FBB rollformer is replaceable as a complete unit, offering a plug-and-play solution for easy installation and quick setup.

Rollers, wedges, pulleys, bearing housings, and side plates are available as standard spare parts. These components ensure easy maintenance and quick replacement; minimizing downtime and enhancing the machine's overall performance.

Available for FBB400/420, FBB500/540, FBB5501, FBB5502 MKII.

Advantages

- Bending-resistant materials
- Reinforced bearing, lubricatable from the outside
- Carbide round wedge adjustable via segments
