

Lower Welding Arms for FBB

SABATEC AG offers a wide range of lower welding arms for FBB machines. All the FBB arms are prepared for air, gas, powder, or lacquer tubes. The Z-bar rail is fully available in carbide and ceramic. Prepared Z-bars for monitor tap are also provided.

Z-bar, and head piece are available as standard spare parts, providing easy replacement and minimal downtime.

The welding arms can be used with mercury-free welding rolls, promoting a safer and more environmentally friendly operation.
