

Pendulum Roller Head Eco Slide

The SABATEC Pendulum roller head PRKES850 (mercury free version) is used on all major can-body welding machines such as ABM, BWM, FBB, AFB, VAA 1000, MWM, RWDa and Soucan's. You only need to change the drive sprocket for the corresponding welder.

Welding disc and cooling flange can be changed to your requirements.
(Needs to be ordered separately, not part of the delivery scope.)

PRKES850

- Easy to install and fit's on the mentioned welders without any rework
- Mercury free and non-hazardous for our environment and your personnel
- Lubricated & cooled
- Can be overhauled
